DETAILED ACTION

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ota(3,892,568) teaches an electrophoretic display having particles(6) stay on the surface of housing wall(4) after removal of the applied electric field(see figure 1b and column 3, lines 2-11).

2. The following is an examiner's statement of reasons for allowance.

None of cited references teach an electrophoretic display having colored charged particlesa(7) have a surface adhesive layer(8)(see figures 3A-3C) which attaches the colored charged particles(7) on the fixing surface so as to retain the display state under no external voltages and allows the colored charge particles to separate from the fixing surface under an external voltage exceeding a threshold value so as to rewrite the display state and the surface adhesive layer comprising a polymer having a glass transistion temperate(Tg) of -35° C to +35° C, with all other limitation cited in claim 1.

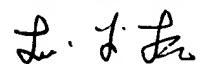

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
